

DHL TRADE AUTOMATION SERVICE

DHL Trade Automation Service is a free online tool providing you the essential customs information you need to plan, budget, and understand international shipping requirements in advance.

MAKE INTERNATIONAL TRADE LESS TAXING.

Receive end-to-end customs compliance criteria and unlimited access to millions of international trade regulations. Databases are updated daily to keep you informed of frequently changing shipping protocols enabling you to make sound import and export business decisions. This tool is designed to facilitate shipping efficiency by helping you search and compile all your vital information quickly. You'll receive information alerts to ensure your restricted party, landed cost estimate, compliance and document report results are accurate and complete. DHL Trade Automation Service provides you the most easy-to-use, comprehensive international trade resources.

Benefits

- Access customs information from a single source
- Automatically obtain required documents
- Eliminate needless administration
- Make knowledgeable sourcing and distribution decisions
- Optimize your supply chain

Simplify the complexities of global trade with DHL Trade Automation Services.

Have the advantage with the opportunity to compare duties, taxes, and regulations in advance for multiple countries at once.

Know exactly how your costs are being allocated with our straightforward calculations providing a complete breakdown of your landed cost estimate. Obtain relevant shipment documentation, related trade regulation information, and applicable licensing requirements, with our search-friendly product classification code tool and reporting capabilities.

FEATURES

- **Landed Cost Estimator** – know the cost to ship any given commodity between countries by receiving an estimate of duties, taxes and other import fees
- **Comparative Services** – assess sourcing options between countries in one simple report providing landed cost estimates, shipping guidelines, and commodity regulations
- **Restricted Party Screening** – check for shipper and receiver restrictions with government and international authority maintained databases of denied party lists
- **Product Compliance Check** – ensure your commodities comply with each country's import and export regulations
- **Interactive Product Classifier** – obtain Export Control Classification Numbers (ECCN), Harmonized System and Schedule B codes for any commodity
- **Trade Document Library** – access a comprehensive collection of import and export documents organized by country to accompany your shipment
- **Service Reports** – store up to 100 shipment profiles for 90 days with the ability to update saved reports for the most current information
